

# Aaromal Anil

Senior Software Engineer | React | TypeScript | Node.js | MERN | AI Engineering

aaromalanil@gmail.com | +91 7907335059 | Trivandrum, Kerala | [linkedin.com/in/aaromalanil](https://www.linkedin.com/in/aaromalanil) | [aaromalanil.in](https://aaromalanil.in)

## PROFESSIONAL SUMMARY

Senior Software Engineer with **4+** years of experience designing and delivering scalable, multiplatform full-stack applications using React, TypeScript, Node.js, and PostgreSQL. Skilled in legacy modernization, performance optimization, and defining frontend project structures and API contracts. Leverages **AI-assisted development with Claude Code** and LLM tooling to accelerate code generation, refactoring, and delivery. Experienced in conducting code reviews, mentoring engineers, and leading cross-functional teams in Agile environments to translate business requirements into production-ready solutions.

## SKILLS

- Frontend:** React.js, React Native, JavaScript, TypeScript, HTML5, CSS3, TailwindCSS
- State Management:** Redux Toolkit, React Query, React Context API
- Backend & APIs:** Node.js, Express.js, GraphQL, REST APIs, Sequelize ORM
- Databases:** MongoDB, PostgreSQL
- Real-time:** SignalR, WebSockets
- AI Engineering:** Claude Code, AI Code Generation, Prompt Engineering, LLM API Integration, Agentic Workflows
- Development:** Git, GitHub, GitLab, Jira, Agile/Scrum, Pull Request Reviews
- Leadership:** Technical Mentoring, API Contract Design, Frontend Folder Structure Design, Technical Documentation

## PROFESSIONAL EXPERIENCE

- Software Engineer**, Synergy EduLearn Pvt Ltd Mar 2025 - Present
- Spearheading a **legacy modernisation** initiative migrating a large-scale EdTech/LMS platform, improving code reliability, maintainability, and developer productivity.
  - Defined scalable frontend folder structures and reusable component patterns to support long-term feature development.
  - Refactored complex database logic from raw stored procedures to Sequelize ORM, **reducing query complexity** and significantly enhancing long-term scalability.
  - Optimized application performance through lazy loading, code splitting, and efficient state management.
  - Collaborating with cross-functional teams in Agile sprints to gather requirements, deliver new modules, and maintain technical documentation of application specifications.
- Full-Stack React Developer**, Freelance / Contract Dec 2024 - Feb 2025
- Delivered full-stack client projects using React, Node.js, and MongoDB by architecting **modular component libraries** and REST API integrations optimized for performance and responsive design
  - Redesigned pages with modular architecture and enhanced UI leveraging component-driven development methodologies to **improve code maintainability** and user experience
  - Implemented responsive mobile-first design ensuring UI compatibility across **all screen sizes** and devices
- Junior Software Engineer**, Softnotions Technologies Pvt Ltd Jul 2023 - Dec 2024
- Led a cross-functional team of 8 engineers to design and deliver a **MERN-based employee management** platform adopted by 100+ users across HR, sales, and engineering.
  - Built reusable, responsive React component libraries with performance optimisations — **lazy loading, memoisation, state co-location** — improving UI responsiveness across multiple product lines.
  - Reviewed pull requests, maintained coding standards, and mentored junior developers on React architecture and best practices.

- Designed technical assessment frameworks for frontend and MERN roles; conducted structured interviews, **improving screening effectiveness by 50%** and reducing time-to-hire by 30%.

**Junior Software Engineer**, Bochdale Solutions Pvt Ltd

Feb 2023 - Jun 2023

- Built modular React Native components for two client projects — Arppan (GraphQL API integration) and C4S App (custom cross-platform modules) — **delivering responsive multiplatform** interfaces on iOS and Android.

**Software Engineering Intern**, Brototype

Jun 2022 - Jan 2023

- Built full-cycle MERN stack projects including an e-commerce platform and a movie booking system, **covering end-to-end development** from responsive React UI to database schema design.

## PROJECTS

---

**MedicoPlus – Clinical Management System** · React, Node.js, MongoDB, SignalR

- Led multi-developer team to ship a full clinical platform handling appointments, billing workflows, and medical history; built real-time dashboards with SignalR, **improving coordination by ~40%**.
- Integrated React Query, **cutting redundant API calls by ~35%** and achieving ~30% faster UI responsiveness.

**LMS – Learning Management System** · React, Node.js, PostgreSQL, Sequelize ORM

- Full-stack platform serving **1,000+ active users**, shipping 10+ production modules across 5+ major releases; replaced raw SQL with Sequelize ORM, **cutting SQL complexity by 80%**.
- Improved API response times by ~25% and reduced frontend load times by ~20% through query optimisation and lazy loading.

**Carehomes Application (UK)** · React.js, Node.js, MongoDB, TailwindCSS

- Responsive care management platform used by ~300 users; owned **end-to-end development** — dashboards, room management UIs, REST APIs, and database schema — reducing UI latency by ~30%.

**iDesigner (US)** · React, JavaScript, React Planner

- Interactive 2D/3D architectural design platform with real-time canvas rendering, complex state management, and a custom calculation engine; **eliminated expensive computation loops**, improving smoothness by ~25%.

**Juntos – Employee Management System** · React, Node.js, MongoDB, TailwindCSS

- Led team of 5 to build a full-stack EMS covering project allocation, timesheets, and workforce forecasting for 30–50 internal users; **React Query caching** reduced redundant API calls by ~35%.

## EDUCATION

---

**B.Tech, Computer Science**, APJ Abdul Kalam Technological University

Jan 2016 - Jan 2020

## CERTIFICATIONS

---

**TypeScript for JavaScript Developers**, LinkedIn

**Building Modern Projects with React**, LinkedIn
